Customer Problem Statement Template:

The Customer Problem Statement Template is used to understand the customer's point of view and identify their needs and problems. It helps in clearly defining what the customer wants to achieve and what difficulties they face. The template follows a simple structure: **I am, I'm trying to, But, Because, Which makes me feel.** This helps in designing better solutions based on customer problems.

In the InsuraGuard-ML project, this template helps identify the problems people face while selecting the right insurance policy and supports developing a system that recommends suitable insurance plans.

Reference: Customer Problem Statement Template (Miro)

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A person looking for a suitable insurance plan	Compare different insurance policies and select the best one	There are many insurance options and it is difficult to choose	Insurance policies have complex terms and conditions	Confused and unsure about which policy to select
PS-2	A middle-class individual who wants financial security	Find an affordable insurance policy for my family	I cannot easily understand policy benefits and risks	Insurance information is scattered and difficult to analyze	Worried and uncertain about making the wrong decision
