Project Design Phase-I
Solution Architecture

Date	7 March 2026
Team ID	
Project Name	InsuraGuard – Insurance Fraud Detection System
Maximum Marks	4 Marks

Solution Architecture:

Solution architecture is a structured process that connects business problems with technological solutions. In the **Insurance Fraud Detection System**, it defines how different system components interact to analyze insurance claim data and identify fraudulent activities using machine learning techniques. Its goals are to:

• Identify the most effective technological solution to detect fraudulent insurance claims using machine learning algorithms.

Example - Solution Architecture Diagram:
